 **Sealed Air**

Bubble Wrap®
BRAND

St. Louis Paper & Box is a proud distributor of **Sealed Air Bubble Wrap®** brand air cellular cushioning. Sealed air is the inventor of bubble cushioning and their Bubble Wrap® brand products set the standards by which other bubbles are judged. What makes our **Sealed Air Bubble Wrap®** brand bubble superior to others? **"THE DIFFERENCE IS IN THE BARRIER"**

Sealed Air Barrier Bubble Technology Provides:

Better Cushioning – Air retention barrier results in a stronger bubble that is up to 30% fuller than competing brands, which provides better cushioning.

Longer Lasting Protection – The barrier layer retains air longer, which maintains consistent cushioning throughout the entire shipping cycle.

Reduced Packaging Costs – Less material required for better protection.

Available in the three following grades:

1. Bubble Wrap® Strong

High-Performance Air Cellular Cushioning for heavy, fragile, and valuable products with long or unpredictable distribution cycles. Meets altitude and creep loss specifications of Mil Spec. PPP-C-795D.

Product	Thickness	Suggested Uses
CS	3/16"	Interleaving and/or surface protection
CS2 CS3	3/16"	Interleaving and/or surface protection for sharp or heavier items
TS	5/16"	Cushioning of fragile, medium weight products.
DS	1/2"	Multi-purpose cushioning
DS2 DS4	1/2"	High-performance cushioning materials for extreme psi loading, and blocking & bracing.

2. Bubble Wrap® Multi-Purpose

General Purpose Air Cellular Cushioning for light to medium weight products with short, predictable distribution cycles. Meets or exceeds the requirements of CID A-A549.

Product	Thickness	Suggested Uses
CM	3/16"	Cushioning of light to medium weight products
TM	5/16"	Cushioning and/or void fill for light to medium weight products
DM	1/2"	General purpose cushioning and/or void fill

3. Bubble Wrap® Limited

Air Cellular Cushioning for surface protection and/or void fill applications for light weight products with short, predictable distribution cycles.

Product	Thickness	Suggested Uses
CL	3/16"	Surface protection and/or interleaving
DL	1/2"	Cushioning and/or void fill for lightweight, less fragile products

Sizes available: We normally stock rolls in 12", 24", and 48" widths. Master rolls are 48" wide and can be slit or perforated per your specifications. Anti-static grades are also available.

Other Air Cellular Packaging Products Available:

Bubble Wrap® bags

- Convenient peel and seal closure
- 10 standard sizes available
- Available in regular and anti-static

Ready-to-Roll® Bubble Wrap® Multi-Purpose

- Self-dispensing and easy tear convenience cartons

Bubble Mask® Strong Adhesive Cushioning

- Adheres to a variety of clean surfaces.
- Saves labor and material costs
- Provides lightweight cushioning/surface protection

Cold Seal® Bubble Wrap® Strong Cushioning

- Sticks to itself, not to the product
- Applies easily
- Eliminates tape
- Saves labor by reducing handling

TempShield Thermal insulating material

- Protects products from dramatic fluctuations in temperature
- Stops heat transfer
- FDA approved materials
